## Preface

The Securities and Exchange Commission (SEC) approved Rule 613 under the Securities Exchange Act of 1934, which requires national securities exchanges and national securities associations (collectively, the Participants) to submit a national market system plan to create, implement, and maintain a consolidated audit trail ([CAT NMS Plan](#)) that would capture customer and order event information for orders in NMS Securities and OTC Equity Securities (Eligible Securities), across all markets, from the time of order inception through routing, cancellation, modification, execution, and allocation. The SEC approved the CAT NMS Plan on November 15, 2016.

In accordance with SEC Rule 613, the CAT NMS Plan requires a Central Repository that will comprehensively track orders throughout their lifecycle and identify the Participants and Industry Members handling them, as well as the account holders and authorized traders for any account that originates an order (Customers<sup>1</sup>). Specific data elements will be submitted to the Central Repository by Participants, Industry Members, and CAT Reporting Agents. CAT Reporting Agents may be third-party firms reporting on behalf of other entities, or may be outside parties that are not required to submit data to the CAT, but from which the CAT may receive data per the CAT NMS Plan, such as the Securities Information Processors (SIPs).

The CAT NMS Plan also requires the selection of an entity as the Plan Processor to be responsible for performing the processing functions required by Rule 613 and the Plan. The Operating Committee of Consolidated Audit Trail, LLC, a governing body composed of representatives of the Participants, oversees the operation of the CAT. The duties of the Operating Committee are further described in Article IV of the CAT NMS Plan.

Refer to SEC Rule 613, available at: <https://www.sec.gov/rules/final/2012/34-67457.pdf> for more details.

Refer also to CAT NMS Plan, available at: <https://www.catnmsplan.com/wp-content/uploads/2018/02/34-79318-exhibit-a.pdf>.

---

<sup>1</sup> Customers are defined in SEC Rule 613(j)(3) as: (i) the account holder(s) of the account at a registered broker-dealer originating the order; and (ii) any person from whom the broker-dealer is authorized to accept trading instructions for such account, if different from the account holder(s).

## 1. Introduction

This specification represents the requirements for reporting Plan Participant specific values.

This document is an Addendum to the CAT Reporting Technical Specifications for Plan Participants, which includes the requirements for reporting Plan Participant data to CAT along with supporting definitions.

## Data Dictionary

Custom Data Dictionary values provided to FINRA CAT by the Plan Participants are represented in this '**CAT Reporting Tehcnical Specifictions Addendum**'. Values are defined in terms of data type, related message types, description, and allowed values. It should also be noted that Custom Data Disctionary values were previously an *Appendix F* of the '**CAT Reporting Technical Specification for Participants**'.

For standard Data Dictionary values that are applicable to all Plan Participants, please refer to '**CAT Reporting Technical Specification for Participants**' most recent version that has been released as of the date document being reviewed.
